ARADHY SRIVASTAVA

SPECIALIZED IN DATA ANALYTICS AND AI/ML

ananynix@gmail.com 7080788117

Dear Sir/Madam,

I am writing to express my keen interest in a summer internship opportunity at your esteemed organization. Currently, I am a third-year student pursuing an MBA in Technology Management (Computer Engineering) at SVKM's NMIMS Mukesh Patel School of Technology Management and Engineering, Mumbai. I am seeking a two-month internship program where I can contribute meaningfully while gaining hands-on experience in a professional, industry-driven environment.

Over the past three years, I have developed a strong foundation in Artificial Intelligence, Machine Learning, and Data Analytics. My academic journey has equipped me with the ability to translate complex data-driven concepts into practical and actionable insights through analytical thinking, effective organizational management, and a clear understanding of technology-driven, market-specific strategies.

I am well-versed in a range of analytical and technical tools, with proficiency in SAS, Power BI, Tableau, Python, Exploratory Data Analysis (EDA), and AutoCAD. These tools, combined with my structured problem-solving approach and ability to balance efficiency with creativity, enable me to analyze, iterate, and communicate insights clearly and effectively.

What excites me most about this opportunity is the chance to work on real-world challenges and contribute to technology-focused solutions that integrate innovation with practicality. I thrive in collaborative settings and maintain a strong balance between enjoying my work and consistently delivering optimum results, while remaining eager to learn from experienced professionals and add value to your team.

I would be grateful for the opportunity to discuss how I can contribute to your projects during the summer internship. Thank you for considering my application.

Sincerely,

Aradhy
